I wanted to take a moment to tell you that as a 3 year employee of Microsoft's Federal division and 24 year officer and tactical jet pilot in the United States Navy, that I understand integrity very well, and have seen Microsoft always act with integrity and always go well beyond what's expected of a company always trying to do the right thing for it's customers.

Please seriously consider ending this political abuse of arguably one of the most important companies in the United States. Microsoft can significantly help lead this country out of recession if it's given the chance. Thank you! Jim
